URL: <http://www.pirsa.org/05080029>

Abstract: Biology cannot be reduced to physics;   
Space of configurations and pre-adaptation;   
The problem of predictability;   
Biology exists with emergent properties.   
Question by Roberto Unger and complementary comments by Lee Smolin;   
Debates: Simon Saunders, Roberto Unger, Olaf Dreyer, Robert Brandenberger, Maya Paczuski, Kalypso Nicolaidis.
