

Title: Informal Chalk and Talk

Date: Aug 12, 2009 01:00 PM

URL: <http://pirsa.org/09080032>

Abstract: Dr. Smolin is a faculty member at Perimeter Institute for Theoretical Physics and author of several books including most recently "The Trouble with Physics". He is known for devising several different approaches to quantum gravity, in particular, loop quantum gravity. His research interests include cosmology, elementary particle theory, the foundations of quantum mechanics, and theoretical biology. This information Chalk and Talk will explore in special topics in Quantum Gravity.
