

Title: Seeing Science Through Fiction

Date: Oct 18, 2009 08:00 PM

URL: <http://pirsa.org/09100169>

Abstract: You've heard the physicists speculate on parallel universes, space travel, and time travel. Now come and hear a physicist interview the real experts in these subjects: a bestselling science fiction writer and pioneer of virtual reality discuss what you get when you look at science through fiction.
