

Title: Ensuring Electricity: What Happens if the Lights Go Out?

Date: Jun 08, 2011 09:00 AM

URL: <http://pirsa.org/11060108>

Abstract: Today we rely on just-in-time delivery of electricity that is sometimes vulnerable to natural disasters and failure at peak demand. This plenary session examines the reliability, resiliency and security of emerging technologies in an increasingly electrified energy system. Speakers include: Bill Rosehart, Maria Skyllas-Kazacos, Ted Sargent, and Walt Patterson
