

Title: Benchmarking for our Energy Future

Date: Jun 05, 2011 02:15 PM

URL: <http://pirsa.org/11060112>

Abstract: If we are to advance technological systems for a low carbon and electrified future, how do we measure progress? Through animated videos and a panel discussion with energy experts, this kick-off session introduces some of the technological challenges and implementation hurdles to be overcome if we are to meet our future electricity needs. Speakers include:Barry Brook, Walt Patterson, Jatin Nathwani, and Robin Batterham
