Abstract:

Open Research: Rethinking Scientific Collaboration

**Perimeter Institute for Theoretical Physics
March 26-28, 2018**

Who we are

- 9 invited speakers, who study

Social minds	Science itself	Cosmology
Computation	Synthetic biology	Bacteria
Human-machine interaction	Quantum matter	Astronomical data

- 6 external participants
- 21 PI residents

Where we are

- Among the largest theoretical physics institute in the world

Strong gravity	Condensed matter	Particle physics
Quantum fields and strings	Quantum gravity	Quantum foundations
Quantum information	Mathematical physics	Cosmology

- Private-public partnership, kickstarted by individual donation, supported by Canada and Ontario
