

Title: Panel Session: 'Forest vs Trees'

Speakers: Lauren Hayward, Sabrina Pasterski, Anthony Leggett, Donna Strickland, Timothy Hsieh

Collection: The Day of Discovery

Date: October 20, 2022 - 5:15 PM

URL: <https://pirsa.org/22100073>

Abstract: Some scientific puzzles require a hyper-focussed (perhaps obsessive) attention to specific questions; others need a zoomed-out, interdisciplinary viewpoint. Some combination of both is often the route to breakthroughs. Panelists will share how they strive to see both the forest and the trees when tackling big puzzles.

The background is a deep space image showing colorful nebulae in shades of green, blue, and red. A bright, glowing circular ring is positioned in the upper left, with a vertical beam of light extending downwards from its center. Two bright star-like points with diffraction spikes are visible in the upper right and middle left areas.
