

Title: Session 1 - Yangrui Hu

Speakers: Yangrui Hu

Collection: POSTDOC WELCOME 2022

Date: October 24, 2022 - 10:40 AM

URL: <https://pirsa.org/22100120>

Representation  
Nonlinear **CCFT** Correlators  
Light-ray Operators Superconformal  
**ANEC** Polytopic **Amplitudes**  
Offshell Colliders **Component**  
Virasoro **Recursion** Born-Infeld **Algebra**  
**Celestial** **SYK** Superfield Deformation  
Holography Conformal Block  
**Supergravity**

Yangrui Hu Oct 24 2022

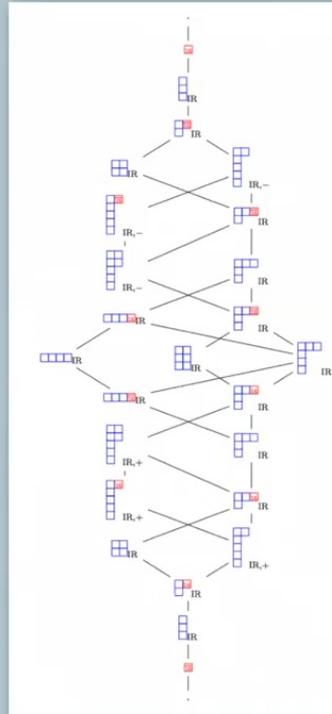

A little bit of my research background

**2018~2021**

- Higher-dimensional Supergravity
- Polytopic SUSY Representation Theory
- 1D, N=4 SYK models
- SUSY Holography Conjecture

with S.J. Gates

$$\mathfrak{su}(32) \supset \mathfrak{so}(1, 10) \Rightarrow \mathcal{R}_{\mathfrak{su}(32)} \xrightarrow{\text{branching rules}} \bigoplus \mathcal{R}_{\mathfrak{so}(1,10)}$$

A little bit of my research background

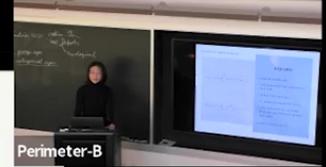

$$\tilde{A}_n(\Delta_i, z_i, \bar{z}_i) = \int_0^\infty d\omega_i \omega_i^{\Delta_i-1} A_n(\omega_i, z_i, \bar{z}_i)$$

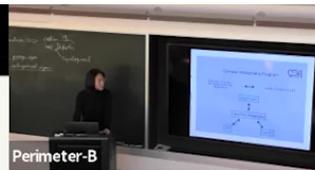

$$\mathbf{L}[\mathcal{O}_{h,\bar{h}}](z, \bar{z}) = \int_{\mathbb{R}} \frac{dz'}{|z' - z|^{2-2h}} \mathcal{O}_{h,\bar{h}}(z', \bar{z})$$

## 2021-2022

- Celestial Amplitudes
- Dual superconformal symmetry in N=4 SYM
- Differential Equations
  - Celestial vs Momentum Space
- Light transforms & conformal block decompositions of celestial amplitudes

with M. Spradlin & A. Volovich

Perimeter-B

# Celestial Holography Program

Quantum Gravity in  
Asymptotically Flat  
Spacetime

Codim-2 Celestial CFT

Amplitudes

CFT

Gravity

## Celestial Holography

Conformal Collider Physics

Stress Tensor Light-ray Operators

Algebra?

Higher Spin Dynamics in Gravity

- Hofman-Maldacena: Average Null Energy Condition (ANEC) operator

$$\mathcal{E}(\vec{n}) = \lim_{r \rightarrow \infty} r^2 \int_0^\infty dt n^i T^0_i(t, r\vec{n})$$

- Cordova-Shao: smeared stressed tensor light-ray ops form an algebra which has BMS subalgebra
- ANEC smeared along the  $\mathcal{F}^+$  forms Virasoro

work in progress w/ S. Pasterski

Celestial  
Holography

- BCFW: 3pt + large-z + unitarity + locality
- CCFT: symmetry + spectrum + OPE
- How they encoded in one another?

Celestial  
Holography  
Dictionary

Celestial  
Recursion

Revisiting  
the OPEs

work in progress w/ S. Pasterski

## TTbar-like Flow Interpretations for Supersymmetric BI

- 3D, N=1 supersymmetric Born-Infeld Theories [Hu, Koutrolikos, 22]

- Maxwell  $\xrightarrow{T\bar{T}}$  Born-Infeld

$$\frac{\partial \mathcal{L}}{\partial \lambda} = \frac{1}{2} T^{ab} T_{ab} - \frac{1}{3} (T^a_a)^2 - \frac{1}{3} (T^a_a) \cdot \sqrt{T\bar{T}} \quad d=3$$

- Supersymmetric Maxwell  $\xrightarrow{T^2}$  supersymmetric Born-Infeld

- 2D and 4D cases have been extensively studied

$$\frac{\partial \mathcal{L}}{\partial \lambda} = \int d^{\#} \theta \mathcal{O}_{T^2} + \text{total derivatives} + \text{EOM}$$

- 3D, N=1 ?

work in progress w/ C. Ferko, K. Koutrolikos, G. Tartaglino-Mazzucchelli

Thank You!
