

Title: Quantum simulation and computing with Rydberg atoms

Speakers: Johannes Zeiher

Collection/Series: Waterloo-Munich Joint Workshop

Subject: Quantum Information

Date: October 02, 2024 - 9:00 AM

URL: <https://pirsa.org/24100052>

Quantum simulation and quantum computing with Rydberg atoms

MAX-PLANCK-INSTITUT
FÜR QUANTENOPTIK

Waterloo-Munich Joint Workshop, Perimeter Institute, 2nd October 2024

Johannes Zeiher, MPQ & LMU

Motivation: Understanding, controlling and creating **many-body systems**

- Fundamental research
Strongly correlated systems, transport, phase transitions, ...
- New technological applications
High-Tc superconductors, quantum computing, ...
- Improved measurement/sensing
Atomic clocks (e.g. time), atom interferometers (e.g. gravity, dark matter)
- Novel light-matter interfaces
Controlled & enhanced light-matter coupling

This talk: Extended-range interacting quantum systems

 Geissler, ... Hofstetter, PRA **95**, 063608 (2017)

Off-resonant admixture $\Delta \gg \Omega$, $\beta = \frac{\Omega}{2\Delta} \ll 1$

$|\tilde{g}\rangle$ „inherits“ (a little bit of)

- ☺ Rydberg - Rydberg interaction
- ☹ Rydberg lifetime

Lightshift modified by blockade

- ✓ Switchable light-induced interaction $V_0 = \frac{\Omega^4}{8\Delta^3} = \beta^3 \Omega$
- ✓ Extended range $R_c = \left(\frac{C_6}{2\Delta}\right)^{1/6}$
- ✓ Increased effective lifetime $\tau_{\text{eff}} = \tau \left(\frac{2\Delta}{\Omega}\right)^2 = \frac{\tau}{\beta^2}$

GEFÖRDERT VOM

Johannes Zeiher

MAX-PLANCK-INSTITUT
FÜR QUANTENOPTIK

- ✓ **Extended Hubbard models with Rydberg dressing**
 - Stroboscopic sequence for extended coherence times
 - Observation of bound states & low-energy state preparation
- ✓ **Strontium as a QC platform**
 - Highly coherent Rydberg dynamics
 - Fast and highly coherent qubits
- ✓ **Continuous loading**
 - Iterative assembly of large-scale arrays
 - Continuous operation of large-scale arrays

Outlook

- Quantum optics in subwavelength optical arrays
- Fast cavity-based readout of Rydberg atom arrays
